

WHAT PEOPLE SAY ABOUT US

"Simply Music integrates music & ICT for children. The visual aids were tremendous. It helped to develop musical literacy in a fresh, innovative way."

Olivia Ryan - Principal, Anacarty National School, Co. Tipperary

"I have never seen anything to incorporate so many elements of music; performance and appreciation, in as exciting and hands-on way as this Workshop. I couldn't fault it. It engages the children's interests/enthusiasm and motivation instantly with the use of technology."

Rachel Cox - Teacher & Arts Co-ordinator, Lucan Educate Together, Co. Dublin

"A fantastically professional product. When the pupils performed it made the whole workshop come alive in a way that I would not have considered possible."

Peter McCabe - Principal, Archbishop McQuaid N.S., Loughlinstown, Co. Dublin

WHAT WE DO

Simply Music delivers award-winning and widely acclaimed **PERCUSSION PERFORMANCE WORKSHOPS** for students from 4 -12 years.

Our workshops blend technology and performance to deliver a unique and unrivalled experience for participants. They are designed to enhance individual musical development and performance skills using technology as a learning tool.

Our content aligns with the objectives of the Primary Music Curriculum of Listening & Responding, Performing and Composing.

HOW DO WE DO IT

We bring the technology, instruments and musicians to your school. The workshops involve hands-on music-making and performance elements, in a fun-filled and focussed learning environment.

All you need to do is choose the workshop that best suits your needs and book with us!

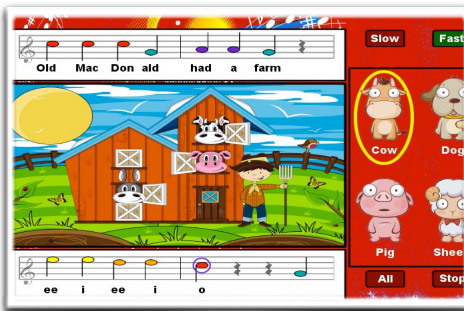

OUR WORKSHOPS

Hands-On! - Juniors (Junior Infants – 1st Class)

Using **Boomwhackers** & audio visual technology these workshops incorporate music-making and performance for children aged between 4 and 7 years.

40 minute workshops are delivered to 6 class groups in a day.

Our approach enables children to experience ensemble playing at an early stage in their musical development.

Hands-On! - Seniors (2nd – 6th Class)

Designed for students from 7 – 12 years this workshop includes a blend of rhythmic development, instrumental exploration, music-making and live performance, using percussion instruments, Boomwhackers & interactive technology.

1.5-hour workshops are delivered to 3 class groups within the 1-day workshop programme.

A more in-depth 2-day workshop is also available, which delivers a deeper level of learning for the students.

iClass Sounds - iPad Workshops

Our iClass Sounds workshop has been designed to suit students from 11 years upwards.

iClass Sounds connects young people's engagement with technology to enhance their creative development. The workshop develops composition, song-writing, recording, production and performance skills across a range of musical genres (as determined by the students themselves).

Our musicians bring a set of **15 iPads, Guitars, Keyboards, Microphones** etc to your school.

We can accommodate 2-3 sessions per day, with 15 students per session.

Using innovative **JamHub** mixers our sessions are delivered with our **Silent Rehearsal/Recording Studios**. This means the session can be held within the school environment without

affecting other classes. This facility also enables the students to work individually or in groups and promotes greater levels of exploration and collaboration in composition and performance.
